

AWS-200 Orbital Welding System

Weldlogic Inc. combined 2 of our standard products, the AWS-200 Advanced Welding System and a Orbital Weld Head. This combination enables a high reliability thermocouple manufacture the capability to produce X-ray clear tube to tube splices.

The AWS-200 Stores all the weld programs to enable low skilled operators the ability to produce high reliability tube to tube welds on a production floor.

Application

- Butt Welding ¼" – ½" diameter 316-SS tubes in 100ft lengths

Industry

- Nuclear – Temperature sensing thermocouples

Requirements

- X-ray clear class 1 welds
