

## **OM-5 Portable Purge Monitor**

The OM-5 Oxygen Analyser is designed to measure Oxygen levels for welding stainless steel pipes, tubes and tanks to prevent coking, oxidation and discolouration. It shows when the Oxygen has been removed down to 0.05% indicating that there are no leaks

Resolution 0.01%  
Range 0.01 – 25% Oxygen  
Aspirator with probe and hose  
Self Calibrating

The OM-5 has a large digital display and operates from an internal, temperature compensated, electrochemical Oxygen sensor (expected life 2 years). Power is provided by two AAA batteries giving up to 2 year operation before replacement is necessary.

The OM-5 is available at low cost as a perfect accessory for use with any pipe purging system or Argon welding chamber.
