

PT-10 Plasma Welding Console

PLASMA WELDING CONSOLE

The PT-10 plasma welding console adds the capability of plasma welding to all Weldlogic TIG power supplies. Idea for Micro Arc plasma applications with the PA 10/100 or higher current needs to 400 amperes using the AWS controller or even for specialty key hole plasma applications the PT -10 expands your welding potential.

Features include three levels of pilot arc settings a on and off switch, a built in water recirculator and heat exchanger and flow and temperature alarms with precision gas flow meter.

PLASMA WELDING TORCHES

Plasma welding torches are available for applications of 0-40 amperes to 100, 150, 200, 300 and 500 amperes.

Please consult your Weldlogic application specialist for the torch best suited to your needs.
