# AWS-200 Vertical 6100 System with High Resolution Camera and Monitor

***With 30 years experience in designing and manufacturing welding lathes, WELDLOGIC sets a new standard in positioner design.***

For the pressure sensor industry Weldlogic Inc. had to produce a low-heat hermetic seal weld with no distortion for a high volume and user friendly system. Our engineers developed a High Resolution Camera and Monitor to enable the operator to easily identify the alignment of the electrode to the weld zone area.

**Application**
- Welding 316-SS Diaphram to weld ring and body

**Industry**
- Sensor / Instrumentation
- Critical alignment of electrode

**Requirements**
- Low heat Hermetic Seal weld
- No distortion
- High volume
