AWS 200/6100 Vertical Welding Station

This AWS-150/6100 System was configured to provide a verticle production welding work cell.
The verticle station conserves valuable factory floor space and was an ideal position for easy part load / unload automation.

A U.V. Arc shield provides factory floor protection and auto sequencing was accomplished thru the AWS-150 remote I/0.

- 30” x 30” adjustable height work station
- Custom Designed Tooling (part alignment)
- Automatic Sequencing of entire process
- U. V. Arc shield with safety sensor
- Horizontal and verticle operation
- Low skill level operator

Application:
304 /316 S.S. Sensor / Bellows Seal Welds

Industry:
Commercial Power Industry

Requirements:
Low Distortion / Hermetic Seal welds at a rate of 60 + welds per hour.
